

OTHERS

By installing the JB-POWER handlebar, the grip position became higher and closer to the rider. When combined with our special seat modification and riding step kit (rear set) the optimized, steady and free riding position will make the Z900RS a much more friendly and easy to tame motorcycle.

※Adapter collars for the JB-POWER
φ22mm handlebar are included.

Handlebar

They are subject to change without further notice.
The colors may slightly vary from the photos in this catalog.

Z900RS

JB-POWER COMPLETE MACHINE

KAWASAKI Z900RS

Forty years have passed since the first Z1 was unveiled. Since those days, the times have changed dramatically. Now the Z900RS has been introduced, emitting a sense of quality you only get from big bikes and a feeling of absolute safety through the latest technology. Whenever I ride the Z900RS, I am overwhelmed by the same feelings I had when I first straddled the Z1, 40 years ago.

BITO R&D considers the Z900RS as the Z1's rightful successor. An optimized riding position in combination with 18-inch wheels create a sense of unity and control, making it effortless to handle a big motorcycle like the Z900RS.

Our Z900RS is far beyond mere transportation. We would like to invite you to lose your sense of time when experiencing this motorcycle.

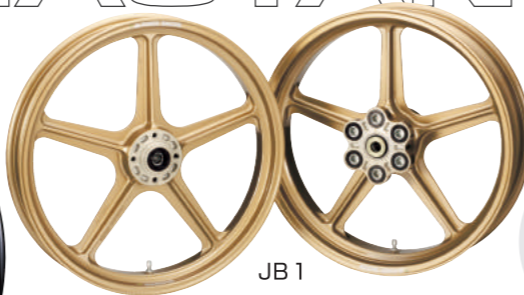

WHEEL FORGED MAGNESIUM WHEELS

Changing to 18-inch wheels not only improved the stability yet transformed the Z900RS into an entirely new motorcycle which is pure riding pleasure in a wide range of applications from urban riding to touring. Our 18-inch MAGTAN wheels are about 30% lighter than the genuine wheels, obliterating the 17-inch wheels biggest advantage.

JB4
MAGTAN Forged Magnesium Wheel Set
¥350,000.-

JB1

	FRONT	REAR
JB1	3.50-17	5.50-17 6.00-17
	3.00-18	4.50-18
JB4	3.50-17	5.50-17 6.00-17
	3.00-18	4.50-18

A JB-POWER Milled Aluminum Sprocket is included with each MAGTAN Set or Rear Wheel. (Hard Anodized)

Colors: Gloss Black, Semi-Gloss Black, Matt Black, White, Gun Metal, Gold, Silver

※Our fender bracket is required in order to install 18-inch wheels. In order to adjust the vehicle height, we offer a special rear suspension link plates (L/R).

EXHAUST HAND BEND TITANIUM EXHAUST SYSTEM

The hand-bend 4 into 1 exhaust system is equipped with a build-in catalyzer, made from only 0.7 mm thin titanium pipes and various other titanium parts (including flanges, collars, silencer). It constitutes a new dimension of lightness and joy with its sublime sound signature, characteristic to titanium.

Hand Bend Titanium Exhaust System
4 into 1, Straight Silencer, Incl. Catalizer
¥330,000.-

Tandem Step [Pillion Footrest] Adjuster for UP-Type Exhaust
¥10,000.-

※Race use only.
※Please use the O2 sensor which is installed in the genuine exhaust system.

Hand Bend Titanium Exhaust System
4 into 1, Angled Megaphone Silencer, Incl. Catalizer
¥330,000.-

SUSPENSION

Improved stiffness and rigidity result in more information being transferred to the rider, leading to a direct feeling. Combined with the increased shock absorption of MAGTAN forged magnesium wheels a synergy effect leads to lighter and more stable cornering, giving you total peace of mind.

Hollow Chromoly Front Axle Shaft
¥15,000.-

Milled Aluminum Fender Bracket
¥15,000.-

※The standard front fork needs to be modified in order to install our fender bracket.

Milled Aluminum Rear Suspension Link Plates (L/R)
Colors: Silver, Black
¥20,000.-

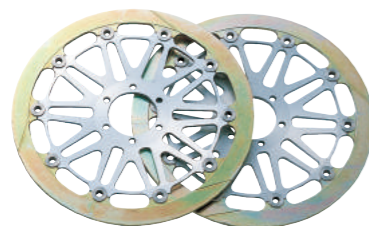

BRAKE SYSTEM BRAKE KIT

Although the genuine brake system is equipped with enough braking power and no change seems necessary, changing the rear brake layout massively improved the overall brake force balance and the rear quick systems greatly enhances maintainability.

NISSIN Brake Master Cylinder
¥20,000.-

Cast Iron Front Brake Disc [for JB-6POT]
1PCS ¥75,000.-

Radial Mount Brake Caliper 6POT [Brake Pads included]
1PCS ¥98,000.-

GOODRIDGE Stainless Mesh Hose / EARL's Stainless Fitting
1PCS ¥11,000.-

Milled Aluminum Spacer Collar for Radial Mount Brake Caliper 6POT
Colors: Silver, Black, Hard Anodized
1PCS ¥2,500.-

※Bolts are included in Radial Mount Brake Caliper 6POT.

FRAME PARTS

Swapping to the JB-POWER Fork Bridge (triple trees) leads to neutral handling and increased riding stability, providing a sense of control, to fully enjoy yourself. Because Fork Bridge and Step (rear set) are variable, they can be easily adjusted to the situation and the riders' preference.

Milled Aluminum Fork Bridge [Triple Trees] (Variable Offset 35/40mm)
